

## **ToutVirtual Chosen for Network World's List of "10 Virtualization Companies to Watch"**

Carlsbad, California – August 30, 2007 – ToutVirtual, an emerging leader in management software for virtual computing infrastructures, today announced it has garnered its place in Network World magazine's list of "10 Virtualization Companies to Watch". On the heels of its freeware launches over the past two years, the company has now firmly staked its ground in the virtualization market with its recently launched VirtuallQ Pro product.

As Joe Clabby, president of Clabby Analytics noted in a report published in Pund-IT on June 13, 2007, "For small and mid-sized businesses that have failed to adopt virtualization due to cost, complexity, and proof issues, this design may be just the ticket to get them to experiment with systems virtualization."

VirtuallQ Pro is a virtualization management solution ideal for IT managers looking to go beyond virtualization configuration tools and ready to take a proactive stance to managing their virtual infrastructure — regardless of virtualization platform or scale. The ToutVirtual VirtuallQ Pro products enable real-time monitoring, host and virtual machine performance management, capacity planning, and faster root-cause analysis. These products are hypervisor agnostic and support multiple and heterogeneous virtualization platforms available from VMware, Microsoft, XenSource and Novell and are available as either software or plug-and-play software appliances. Both the scalability and heterogeneity of VirtuallQ Pro make it ideal for small, medium and enterprise-level environments.

"Making Network World's list of '10 Virtualization Companies to Watch' in this competitive virtualization market is an honor for us and gives us the feedback that we're bringing the market what it needs," said Jess Martinez, president of ToutVirtual. "We recently launched VirtuallQ Pro which enables broad deployment of virtualization technology in a snap, and we're about to launch additional new products that customers have been asking for. The momentum we have is great and we're excited to do our part to bring virtualization to companies of all sizes and complexities. "

### **About ToutVirtual**

ToutVirtual, Inc. is an emerging leader in virtualization system management software to manage and automate virtual computing processes and ease the move from pilot to production. VirtuallQ, the company's flagship product suite, allows organizations to obtain a holistic view and control their virtual infrastructure including servers, applications, storage, and clients independently of the

underlying virtual computing platform. Unlike other companies whose products are vendor specific, platform specific, or network tier specific, ToutVirtual software operates across multiple platforms and is multi-tier to prolong product life, protect IT investments, and maximize ROI. Additional information about the company and its products is available at <http://www.toutvirtual.com>.
