

## ToutVirtual Announces VirtuallQ Pro for XenServer

*VirtuallQ suite of products now adds support for leading virtualization platform from Citrix*

**Carlsbad, Calif. – February 23, 2009** – ToutVirtual, an emerging leader in [virtualization intelligence](#), optimization and performance-management software for virtual computing infrastructures, today announced that its VirtuallQ suite of products now also support all editions of Citrix® XenServer™. With the certification under Citrix Ready, VirtuallQ is now certified to manage XenServer environments and heterogeneous environments that include XenServer.

The VirtuallQ suite of products is designed to support virtual server room operations through [three stages of virtualization](#) — design, deploy, and deliver stages — helping users make correct decisions for virtualization optimization along the way. For instance, in the *design* stage, the issues are physical-to-virtual (P-V) migration, calculating ROI, platform selection, how to decide which applications get consolidated on which hosts, resource optimization, and so forth. In the *deploy* stage, the challenges are managing available server capacity, controlling virtual server sprawl, performance optimization, and resource dependency just to name a few. In the *deliver* stage, the hurdles are managing heterogeneous virtual environments, service-delivery optimization, policy-based actions like spinning a new virtual machine, and more.

The suite of products allows users to compare how various virtualization platforms, such as XenServer, perform running different applications, such as XenApp and XenDesktop, and then provides visibility and policy-based control in managing the XenServer-based environment. The VirtuallQ suite of products supports multiple virtualization platforms — not just Citrix — for an apple-to-apple comparison and provides all essential decision-making data in a single, integrated web console that is simple to install and use. ToutVirtual is partnering with Citrix under the Citrix Ready Program, which showcases and recommends solutions demonstrating compatibility with Citrix Application Delivery Infrastructure.

VirtuallQ products provide Citrix customers key benefits including:

- [Management and best practice tools](#) for optimizing each stage (design, deploy, deliver) of XenServer-based virtualization
- Flexible and user-determined control for automating virtualization infrastructures with policy-driven XenMotion and VirtuallQ “Crawl-Walk-Run” methodology
- Role-based web access for extending IT governance to XenServer-based virtualization platforms

- Freeware version of the fully featured [VirtualIQ to manage XenServer](http://www.toutvirtual.com/downloads/downloads.php) running up to 5 CPU sockets or 25 virtual machines available at: <http://www.toutvirtual.com/downloads/downloads.php>

“We are pleased to work with ToutVirtual in defining best practices for managing virtualization processes,” said Simon Crosby, chief technology officer for the Virtualization and Management Division, Citrix Systems. “ToutVirtual’s VirtualIQ products enable our XenServer customers to better assess and optimize applications for their environments, assisting them in making the right planning decisions.”

“ToutVirtual is pleased to strengthen its relationship with Citrix,” said Vipul Pabari, chief technology officer for ToutVirtual. “VirtualIQ with XenServer enables Citrix channel partners and users to optimize each stage of virtualization. Best practices highlighting automation are a necessity in managing virtual infrastructures, which is why we developed policy-based ‘Crawl-Walk-Run’ automation methodology. Whether the user is just getting started in the design phase, or further along in deployment, or delivering advanced services, the VirtualIQ suite of products is simple and cost effective.”

### **Pricing, Availability and Platforms Supported**

More information about the VirtualIQ suite of products is available at: <http://www.toutvirtual.com/downloads/downloads.php> Channel partners interested in joining the ToutVirtual reseller program should go to <http://www.toutvirtual.com/company/reseller.php?ctype=new>

### **About ToutVirtual**

ToutVirtual, Inc. is an emerging leader in virtualization intelligence and system optimization software to manage and automate virtual computing processes and ease the transition from design to deployment. VirtualIQ, the company’s flagship product suite, allows organizations to obtain a holistic view and control their virtual infrastructure including servers, applications, storage, and clients independently of the underlying virtual computing platform. Unlike other companies whose products are vendor specific, platform specific, or network tier specific, ToutVirtual software operates across multiple platforms and is multi-tier to prolong product life, protect IT investments, and maximize ROI.

ToutVirtual and VirtualIQ are registered trademarks or trademarks of ToutVirtual, Inc. All other marks and names mentioned herein may be trademarks of their respective companies. Citrix®, Citrix Ready™ and XenServer™ are trademarks of Citrix Systems, Inc. and/or one or more of its subsidiaries, and may be registered in the U.S. Patent and Trademark Office and in other countries. All other trademarks and registered trademarks are property of their respective owners.
